Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

1. This Office action is in response to the application filed by Nezu et al., on 5/18/05 for the invention titles "On-Vehicle Apparatus and Content Providing Method".

Election/Restrictions

2. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-5 and 12, drawn to an in-vehicle map and video display apparatus and method.

Group II, claim(s) 6-8 and 13, drawn to a hierarchical menu remote commander apparatus and method

Group III, claim(s) 9-11 and 14, drawn to an apparatus and method of a remote commander for a hierarchical menu having a main rotary operator and a sub rotary operator.

Group IV, claim 12, drawn to an in-vehicle map and video display method.

Group V, claim 13, drawn to a hierarchical menu remote commander apparatus method.

Group VI, claim 14, drawn to a method of a remote commander for a hierarchical menu having a main rotary operator and a sub rotary operator.

The inventions are distinct, each from the other because of the following reasons:

3. The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Groups I and II& III

Art Unit: 3663

differ in the special technical feature where the claims of Groups II & III both recite operation of a hierarchical menu through the use of a remote commander, and where the special technical feature distinguishing the claims of Group II and Group III is that Group III recites both a main rotary operator and a sub rotary operator as part of the remote commander.

The inventions of Groups I-III and IV-VI differ in that the former (Groups I-III) represent the apparatus embodiments of claimed inventions, while the latter grouping (Groups IV-VI) represent the method embodiments of the invention, there being no special technical feature found.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Art Unit: 3663

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Edward Pipala whose telephone number is 571-272-1360. The examiner can normally be reached on M-F 9-5:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jack Keith can be reached on 571-272-6878. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
